STONE & TILE

Thinline Stone Laminates are some of the most exciting and innovative applications of natural stone available today. Once mundane surfaces are transformed into sophisticated showcases.

STONE & TILE COMPANY

NATURAL SLATES & QUARTZITES

Light weight. Flexible. Available in thicknesses from 2mm to 4mm (due to variations in natural stone surface). Real stone with endless applications.

Calibrated and available in a variety of sizes, Thinline Stone Laminates are extremely easy to install.

Through applications on woodwork, walls, ceilings, counter tops, cabinets, etc., any space can be modified into a luxurious environment.

TRANSLUCENT THINLINE VENEER

Natural Stone meets the beauty of light, with Thinline Translucent Veneer. Our revolutionary process is taken one step further, transforming Thinline Laminates into beautiful filters when installed over internally lit structures.

FIRE RETARDANT THINLINE LAMINATES

FOR SPECIAL APPLICATION

No longer are any potential applications off limits with Thinline Laminates. All format fireplaces, stove-tops, and barbecue-grills can feature Thinline Stone Laminate installations, using our special Fire Retardant option. It is not suggested to put stone laminate in continues hot temperature, as in the case with old other fire retardant product in journal, because the product may get effected.

Lab test report can be provided on request
